

THE UGA x GNOSIS REWARDS LOOP EXPLAINED

Welcome to the jungle of DeFi mastery, where UGA and GNOSIS form an infinite, compounding rewards loop designed to reward those who provide real value. This system is a closed yet ever-evolving ecosystem where participants are incentivized not only for liquidity provision but for responsible market behavior, long-term holding, and smart reinvestment.

The UGA x GNOSIS rewards loop allows you to: - Earn \$GNOSIS tokens by providing liquidity to the **UGA/XRP pool** - Use those \$GNOSIS tokens to provide liquidity in the **GNOSIS/XRP pool** - Receive **UGA/XRP LP tokens** in return from the GNOSIS pool - Compound your UGA LP position, increasing your daily \$GNOSIS rewards - Loop again for exponential growth

This creates a regenerative cycle where your initial contributions multiply over time, if you stay engaged. Think of it as planting a banana tree that keeps producing fruit — and using each banana to plant another tree.

FULL STEP-BY-STEP GUIDE: ENTERING & MASTERING THE LOOP

PHASE 1: STARTING THE LOOP — PROVIDING LIQUIDITY TO UGA/XRP

Step 1: Head to <https://xmagnetic.xyz> and click "Connect Wallet."

Step 2: Choose **XAMAN Wallet** (or your preferred XRPL-compatible wallet).

Step 3: Once connected, search for **UGA** in the token bar and ensure you select the correct token.

Step 4: On the UGA token page, go to the "**Services**" section and click "**AMM.**"

Step 5: You'll be redirected to the AMM dashboard. Click "**Deposit**" in the swap module.

Step 6: Choose your deposit method: - **Single-Side Deposit (XRP only)** - **Dual-Side Deposit (UGA + XRP)**

Enter the amounts and confirm the transaction.

Step 7: Once deposited, head to the "**Contributors**" section to verify your LP token share (%).

Step 8: Go to the [@GnosisXRPL Twitter account](#) and click on their Linktree.

Step 9: Click the "**GNOSIS Trustline**" link to set the trustline in your XAMAN wallet.

Step 10: You'll be redirected to XRPL Services — confirm the trustline request.

Step 11: Slide to accept in your XAMAN wallet.

Result: You'll start receiving **\$GNOSIS rewards** daily, based on your share of the UGA/XRP pool.

PHASE 2: COMPOUNDING — ENTERING THE GNOSIS/XRP POOL

Step 12: Once you receive \$GNOSIS rewards, go back to xmagnetic.xyz.

Step 13: Search for **GNOSIS** in the token search bar and verify the correct token.

Step 14: On the token page, go to **Services > AMM** to access the GNOSIS/XRP pool.

Step 15: Click "**Deposit**" and choose either: - **Single-Side (XRP)** - **Dual-Side (GNOSIS + XRP)**

Confirm your deposit.

Step 16: Check your LP token share in the contributors list to confirm your deposit.

Step 17: Go to [@UgaBugaXRPL Twitter](https://twitter.com/UgaBugaXRPL) and click the Linktree.

Step 18: Click "**UGA/XRP Trustline**" to enable reception of UGA LP tokens.

Step 19: Confirm the trustline in XRPL Services and approve it in your wallet.

Result: You'll begin receiving **UGA/XRP LP tokens** as rewards from your GNOSIS LP position.

These new UGA LP tokens qualify you for even more \$GNOSIS in the original loop. That's the compounding effect in action.

PHASE 3: TAKING PROFITS THE RIGHT WAY

Step 20: If you want to take profits without being a jeeter:

- Go to the token page (UGA or GNOSIS) and select "**Trade**" from Services.
- You'll enter the Trading Interface with full access to the chart, orderbook, and trade module.

Step 21: Select **Sell**, then **Limit**.

Step 22: - Enter the **amount** of tokens you want to sell - Choose a **limit price above market** - Verify the order book and avoid undercutting the chart - Click "**Place Sell Order**"

This allows you to: - Realize gains at higher levels - Avoid dumping on the tribe - Preserve your eligibility in the loop

FINAL THOUGHTS

This system isn't just about farming tokens. It's about creating a healthy ecosystem where: - Good actors are rewarded - Dumpers are sidelined - Liquidity deepens - The project sustains

If you loop smart, respect the flow, and keep compounding, this isn't just a DeFi play — it's your digital jungle kingdom.

Welcome to UgaLabz.

UGA BUGA FOREVER 🍌🍷
